

Techfugees Hackathon
Team #4

Insight

- Today 5200 refugees with residency is waiting to settle down.
- Expecting 50.000 refugees in the next 3 years.

Problem

How can we most efficient solve settlement problems for refugees that are already waiting?

How can we solve the problem for the estimated 50.000 refugees that will arrive from 2016-2019?

Our target group

- Our target group is young adults that are ready to embrace the working life. We will also help anyone who feels ready to head straight out into society.
- We can easily recognize our self in our target group, which in many ways are similar to us in interests, education and life goals.
- A large percentage of the new arriving refugees will be in our target segment.

Solution

- Fast Track Refugee
- Plattform/organisation
- Self settlement (Selvbosetting)

Visual example

<http://fasttrackrefugees.com/>

Action next step

- Founding
 - Grants
 - Government
 - Foundations
- Resources
 - Volunteers
 - Organizations/Firms
- Execution
 - Movement leading to solve a future problem

impact/conclusion

- Current situation
- We should have started yesterday
- Refugees of Norway (network)
- IMDI (Shows the other solutions doesn't work optimal)
- Win Win situation (our program is customized for our target group)
- Provident
- Integration is a common responsibility
From the people too the people!

It could have been us..
